The best mono-pole and roof-top cell tower concealment shroud available today.

Installation is Quick

Typical installation takes only a few hours for a trained crew. Once installed, maintenance is a breeze. Super Shroud™ makes a **great replacement product** for failing shrouds.

Easy Access

Super Shroud™ simply opens up, swings out of your way, and spins to allow full 360 degree access. There are no parts or fasteners to remove. **Goodbye plastic screws!**

Ultra-Low RF Loss

Due to the materials used and our special manufacturing process, Super Shroud™ allows maximum RF transparency and **360 degrees of signal throughput.**

Saves Money

By reducing access time and requiring less upkeep, your maintenance **costs can go down 50% or more.**

Standard or Custom Sizes

Standard sizes ranging from up to 70" diameter and up to 12' tall. Shrouds can be engineered to mount to flanges or to the spine.

Mono-Pole Ready

Super Shroud™ is the perfect concealment option for mono-pole applications. **Say goodbye to needing two cranes!**
